1 telisca bundles description

telisca propose a complete offer of applications for Cisco collaboration (Cisco Unified Communication, HCS, Business Edition).

These applications are installed automatically by a global setup on the same Virtual Machine, on Windows Server 2012 or 2016.

telisca propose two bundles **Standard** and **Premium** including a selection of telisca products for a desirable price:

These applications full fill all the needs of Cisco telephony users (IP Phone or Jabber): directory and reverse lookup, recording, call analysis, switchboard, small contact center, phone security, call filtering, busy calls and missed calls treatment.
